### Corporate Wellness Program

Many Corporations and small businesses have found massage therapy and spa wellness to be a low cost benefit that helps to attract and retain quality employees and help them achieve peak performance. It's clear to see why the leading fortune 500 companies offer massage as part of their employee benefit program.

Many large companies have found massage therapy to reduce headaches, back strain and fatigue since offering massage therapy as well as other wellness services such as facials, manicures and pedicures as a benefit to their employees. Companies understood that these benefits would help decline in turnover rates, an increase in problem-solving aptitude heightened morale.

### Benefits of offering massage and wellness to your employees include:

- \*Reduced stress
- \*Decreased absenteeism
- \*Greater company appreciation
- \*Lower blood pressure
- \*Increased employee retention and improved employee morale
